DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 3/16/2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Drawings

2. The replacements sheets drawing figures 31-33 were received on 04/25/2006. These replacement sheets of drawing figures are acceptable.

Allowable Subject Matter

3. Claims 1-7 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claim 1: In view of the limitations the prior art does not fairly suggest or disclose alone or in combination an elevator control apparatus having a processing portion and a power supply voltage monitoring circuit, wherein the elevator control apparatus further includes a voltage monitoring soundness checking function circuit to output a monitoring input voltage forcible change signal to forcibly change the power supply voltage input to the power supply voltage monitoring circuit in response to a control signal from the processing unit and to which a voltage abnormality detection signal from the power supply voltage monitoring circuit is input and wherein the voltage monitoring soundness checking function circuit holds at least some of contents of signals exchanged between the processing portion

Art Unit: 2837

and the power supply voltage monitoring circuit, and the processing portion checks soundness of the power supply voltage monitoring circuit by reading data held by the voltage monitoring soundness checking function circuit.

The prior art cited in PTOL-1449 and 892 describe various apparatus and control system for detecting failures or faults in the power supply in elevators or lift system, however, there is no teaching or fairly suggestion to combine the prior art references to have a voltage monitoring soundness checking function circuit to output a monitoring input voltage forcible change signal to forcibly change the power supply voltage input to the power supply voltage monitoring circuit in response to a control signal from a processing unit and to which a voltage abnormality detection signal from the power supply voltage monitoring circuit is input.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
